

## Tailored GenAI/LLM Solutions Specially for Your Business

### Unlock a Competitive Edge with GenAI & LLM Solutions for Your Business

We offer GenAI and LLM solutions tailored to your company's data and knowledge, deployed on your premises or private cloud. This ensures company-specific responses, helping you gain insights, significantly improve efficiency, and stay ahead of the competition, all while maintaining data privacy.

Some of the Ways, We Can Help You:

#### 1. Business Insight

- Achieve real-time analysis of sales and cost patterns with automated anomaly detection. Instantly identify revenue drops, cost spikes, and root causes such as seasonal trends or shifts in customer behavior, with alerts that might be missed by traditional analysis.
- Gain insights specific to your business context, surpassing the generic responses typical of standard solutions.
- Ensure that your data remains within your business, unlike third-party solutions.

2. **DevOps Automation:** Automate stages of the DevOps lifecycle, from analysis to testing, to speed up product launches and let your IT teams focus on innovation.

3. **Customer Service Knowledge Base:** Implement an AI-driven knowledge base for customer support, with LLMs trained on your data for accurate, company-specific responses.

#### The “GenEdge” Approach

1. **Due Diligence:** Identify high-impact use cases that offer the greatest business benefit and can be implemented swiftly.
2. **Model Selection:** Choose the most suitable GenAI/LLM model for your needs.
3. **Context Building and Model Training:** Collect your company-specific data and documents to set model context or train the model as required.
4. **Solution Development/Customization:** Develop or customize a software solution based on our framework, incorporating your integrations, etc.
5. **Implementation:** Deploy the solution on your premises or cloud.
6. **Ongoing Support:** Offer post-launch support for continuous model upgrades and training, or transition to your in-house team.

#### Why Choose AIEdge?

- **Expertise:** Proven skills in AI/ML, GenAI, LLM, cloud integration, and full-stack development.
- **Security & Scalability:** Commitment to creating secure, scalable, and reliable architectures.
- **Tailored GenAI/LLM:** Customized services that align with your unique business needs and technology vision.
